STORES

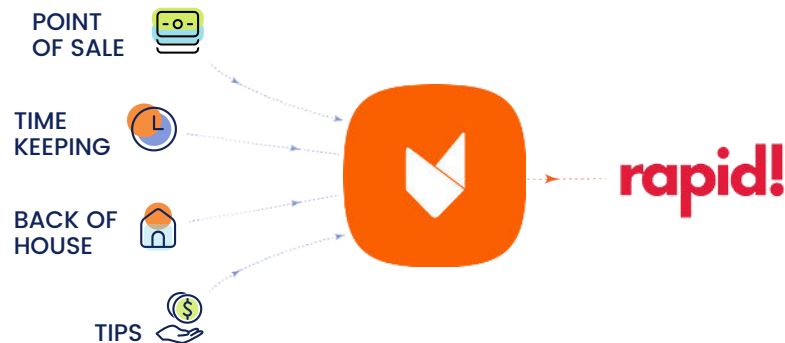

Available, representing 2.7
million employees

150+
INTEGRATIONS

Pre-built by Delaget to
make data easier to access
than ever

How Delaget makes data integration easy for you and your restaurant clients

rapid!'s connection to the Delaget API removes the challenge of accessing key restaurant data including time and tips. The Delaget API allows for the data to come to rapid! through one single source versus many separate systems that take time and resources to build connections to.

Secure and reliable integration with Delaget's API automates the time and tips data for clients - now that's a win-win! Ready to automate your restaurant clients' data? Click the link below to start!
